Journal of Materials Processing Technology, 31 (1992) 449-451
Elsevier

Contents Volume 31

Vol. 31, Nos. 1&2, May 1992

Special Issue: Proceedings of the International Conference on Developments in Forming Technology, Vol. 2, Lisbon, Portugal, September 12-14, 1990

Preface
S.K. Ghosh (Siegburg, Germany) vii
Developments in forming technology — An engineering educator's approach (*Keynote address*)
W. Johnson (Cambridge, UK) 1
Finite-element analysis of the three-stage cold extrusion of steel cups
J.M. Prikazsky, P. Hrycaj (Toulouse, France), P. Picart, J. Oudin, D. Lochegnies and Y. Ravalard (Valenciennes, France) 27
Metal flow in the direct axisymmetric extrusion of aluminium
H. Valberg (Trondheim, Norway) 39
Theoretical simulation of sheet behaviour in forming processes
J.Z. Gronostajski and Z. Zimniak (Wrocław, Poland) 57
Numerical simulation of inertial effects in Newtonian flows: Application to the filling stage of the die-casting process
F. Muttin, M. Bellet and J.L. Chenot (Valbonne, France) 65
Critical calculations and experimental research on the drawing of a sheet with a hole
Wang Zhiheng and Tong Zheng (Hohhot, China) 75
The experimental simulation of deformation behavior of metals in the CONFORM process
D.S. Peng, B.Q. Yao and T.Y. Zuo (Changsha, China) 85
Graph software developing tools for designing forming machines and dies
J.Y. Wang, Y.G. Wang, Y.S. Zhang and G.Q. Cheng (Wuhan, China) 93
A methodology for the manufacture of forming tools incorporating complex surface geometry with minimum computer resources
D.K. Harrison, D.G. Cheshire, T.S. Baines (Stafford, UK) and V.I. Vitanov (Sofia, Bulgaria) 103
Prediction of corner-cavity formation during backward extrusion by the modified slab method
Wu Shichun, Dang Zhen and Li Miaoquan (Xian, China) 113
Review of flash design rules for closed-die forgings
E. Sleeckx and J.P. Kruth (Leuven, Belgium) 119
Explosive forming of spherical metal vessels without dies
Zhang Tiesheng, Li Zhensheng, Guo Changji and Tong Zheng (Hohhot, China) 135
The ejection of precision-forged straight and helical spur-gear forms
M.H. Sadeghi (Tehran, Iran) and T.A. Dean (Birmingham, UK) 147
Research on rotary forging and its distribution of deformation
D.C. Zhou, Y.D. Han and Z.R. Wang (Harbin, China) 161
Further investigation into the hydro-bulging process for 32-sided polyhedral shells
S.H. Zhang and Z.R. Wang (Harbin, China) 169

Elsevier Science Publishers B.V.

A study of the precision rolling and thermomechanical treatment of bearing rings
Li Yan Xiang, Zheng Shi An, Liu Ping and Zhang Yao Zong (Luoyang, China) 179
New developments in forming technology in China
Xinlu Yu (Beijing, China) 189
Metal-forming process analysis by the visioplasticity method: Application to stationary and non-stationary processes
L. Chevalier and N. Dahan (Cachan, France) 199
The investigation of the JTS forging process by a high-temperature Moiré modelling technique
Deng Zhi (Beijing, China) 209
Theoretical investigations on the constitutive equation for superplastic materials
J.D. Bressan (Joinville, Brazil) and B. Baudelet (Saint-Martin-d'Heres, France) 217
Tribological behaviour of W–C–Co coatings
A. Ramalho, M.T. Vieira (Coimbra, Portugal) and A.S. Miranda (Braga, Portugal) 225
A study of wear mechanisms in the cold rolling of aluminium strip
Zhang Hui and Wang Manxing (Changsha, China) 235
Finite-element numerical analysis of sheet metal under uniaxial tension with a new yield criterion
Ping Hu, Jianshe Lian and Jiwei Chen (Changchun, China) 245
Prediction of tool wear using finite-element software for the three-dimensional simulation of the hot-forging process
Y. Tronel and J.L. Chenot (Valbonne, France) 255
A solution to some metal-forming processes by the flow formulation
M.J.M. Barata Marques and J.M.C. Rodrigues (Lisboa, Portugal) 265
A computer algorithm to link a finite-element package to the CAD/CAM of cold roll-forming
G. Haritos, S.K. Ghosh (Stafford, UK) and D.A. Milner (Birmingham, UK) 277
Analysis of temperature and membrane stresses on welding and cooling in the process of producing 304 stainless-steel pipes
Y. Kasuga (Tokyo, Japan), T. Jimma (Nagoya, Japan) and Y. Yamaguchi (Kanagawa, Japan) 295
Multi-criteria optimization of cutting processes
G.R. Sotirov, V.I. Vitanov, N.Ch. Mincoff (Sofia, Bulgaria), S.K. Ghosh and D.K. Harrison (Stafford, UK) 307
Effect of chip-breaker geometries on cutting forces
R.M.D. Mesquita and M.J.M. Barata Marques (Lisboa, Portugal) 317
Moiré topography analysis of the buckling process of a square sheet metal plate subjected to non-uniform tension
Yuwen Liu, Guang Yang, Jianshe Lian and Linsheng Liu (Changchun, China) 327
A parametric FEM analysis of extrusion using a personal computer
A. Alto, L.M. Galantucci and L. Tricarico (Bari, Italy) 335

Vol. 31, No. 3, June 1992

Editorial 347
The role of deposition parameters and adhesion effects on the formation of thin films on high-speed steel
M. Ahern and M.S.J. Hashmi (Naas, Ireland) 349

Criterion and mode of the forming limit in sheet forming
H. Moritoki (Akita, Japan) 363
Theory of the drawing of cylindrical parts from sheet materials
V.A. Zharkov (Moscow, Russia) 379
Development of a numerical code based on the slip-line field method: Application to the fine-blanking process
J. Morreale, J.-L. Marchand (Florange, France) and F. Ronde Oustau (la Garenne-Colombes, France) 393
Rupert's glass drops: Residual-stress measurements and calculations and hypotheses for explaining disintegrating fractures
W. Johnson and S. Chandrasekar (West Lafayette, IN, USA) 413

Researchware
Semi-continuous extrusion of round bars
S. Thiruvarudchelvan (Singapore) 441

Letter to the Editor
A new equation for calculating the overall length of a metal part to be bent
Deng Shou Kun (Shiyan, China) 445

Acknowledgement of Referees 447
